Office Action Summary

DETAILED ACTION

Election/Restriction

1. Applicant's election without traverse of Group I, claims 1-57, in Paper No. 11, filed March 27, 2002 is acknowledged.

Specification

2. The disclosure is objected to because of the following informalities: In page 6 of the instant specification that, the brief description of the drawing for Figures 1-7 are not being complied with the 37 C.F.R. §1.74. If a figure contains several parts, for example, figure 1A, 1B, and 1C, the figure may be described as figure 1. If only figure 1A is described in the brief description, then applicant is require to either add a brief description of figure 1B and 1C or describe the figure as "figure 1." See MPEP § 608.01 (f) and 608.02. Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*,

11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-57 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,471,913. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed members of an apparatus are overlapped by apparatus of cited patent.

Claim Rejections - 35 USC § 103

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).
7. Claims 1-57 are rejected under 35 U.S.C. § 103 as being unpatentable over USP 6072163 to Armstrong et al (PTO-1449) or USP 6073681 to Getchel et al.
8. The cited reference(s) disclose(s) the features including the claimed workpiece support, heat source, heat sink, and fluid channel for cure, bake, and cool said workpiece. The features relied upon described above can be found in the reference(s) at: Armstrong et al (col. 3, line 20 to col. 4, line 40; col. 5, line 59 to col. 6, line 64; col. 8, lines 50-56; col. 9, lines 53-67; col. 10, lines 12-21; paragraph bridging col. 10-11; col. 13, lines 19-36) and Getchel et al (col. 4, lines 38-53). Overlapping elements have been held to be a prima facie case of obviousness.

Conclusion

The above rejection relies on the reference(s) for all the teachings expressed in the text(s) of the references and/or one of ordinary skill in the metallurgical art would have reasonably understood or implied from the text(s) of the reference(s). To emphasize certain aspect(s) of the prior art, only specific portion(s) of the text(s) have been pointed out. Each reference as a whole should be reviewed in responding to the rejection, since other sections of the same reference and/or various combination of the cited references may be relied on in

future rejection(s) in view of amendment(s).

All recited limitations in the instant claims have been met by the rejections as set forth above.

Applicant is reminded that when amendment and/or revision is required, applicant should therefore specifically point out the support for any amendments made to the disclosure. See 37 C.F.R. § 1.121.
